

**WHEN YOU'RE WASHING YOUR CAR IN THE DRIVEWAY,
REMEMBER
YOU'RE NOT JUST WASHING YOUR CAR IN THE DRIVEWAY.**

All the soap, scum, and oily grit runs along the curb...then into the storm drain and directly into our lakes, creeks, and rivers. And that causes pollution that is unhealthy for fish and other aquatic life. So how do you avoid this whole mess? Easy. Wash your car on grass, use a spray nozzle to reduce water use and runoff into the streets. Limit your soapy water to a bucket which can later be emptied into a sink or toilet. Or better yet, take it to a car wash where the water gets treated and recycled.
